

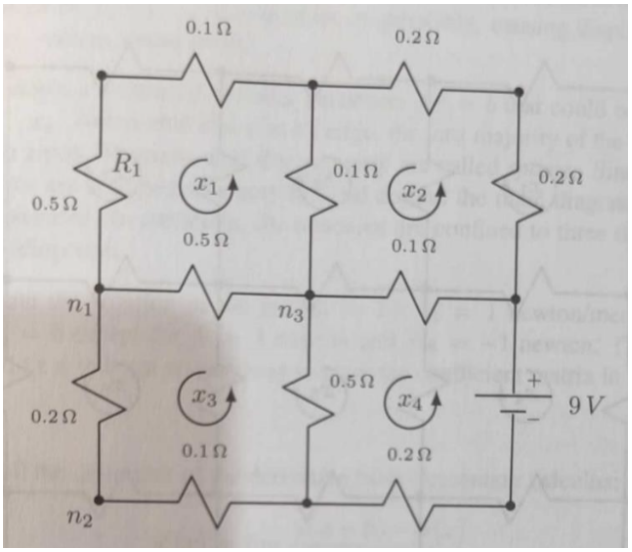

Figure 1: Electrical circuit with loop currents

Linear Circuit

The figure above shows system circuits with unknown loop currents

Problem

Write out a linear system $Ax = y$ of four equations for the unknown loop currents then write a function that solve for loop currents x.

Implementation

Goal: Fill the given function then submit your function in grader:

```
import numpy as np

def solve_linear_circuit():
    A = ...
    y = ...
    ...
    return A, y, x
```
